

Maximum Resiliency Means Minimal Maintenance

Endura cabinetry is built to be UV and weather resistant. Crafted from high-density polyethylene (HDPE), Endura is built to withstand rigorous daily outdoor and indoor use. To keep Endura cabinetry looking good, follow these simple cleaning instructions.

General Care

- Clean regularly with a standard soap and water solution and a soft cotton cloth.
- Acceptable cleaners: 10% chlorine bleach dilution, hand washing liquid soap, glass cleaner, ammonia, furniture polish.
- If debris or grease appears on the surface, spray the affected area with a garden hose. If necessary, remove excess dirt and debris by scrubbing with a soft bristle brush or sponge.
- Allow the material to air dry or use a soft towel to remove excess moisture.
- A pressure washer with no greater than 1500 PSI may be used to remove dirt, dust, or other types of airborne particulates. Use a wide angled (40° >) spray nozzle and do not direct the sprayer less than 8" from the cabinetry surface.

AVOID The Following Cleaning Products

- Chemical cleaners, sprays, and hard scrubbers.

- Spic & Span which contains abrasives Sodium Carbonate and Sodium Silicate.
- Tilex which contains Sodium Hypochlorite.
- Comet which contains abrasives Calcium Carbonate and Sodium Carbonate.

Hardware Cleaning Care

Decorative surface hardware such as drawer and door pulls, and knobs should be stainless steel, with stainless steel screws for best results. Refer to the hardware manufacturer's recommendations for the cleaning of stainless steel hardware.

Hinges require little to no maintenance. Should dust or debris appears on the surface of a hinge, remove using a soft bristle brush or toothbrush.

Apply spray lubricant such as WD-40 to the hinge. Then open and close the cabinet door a few times so the lubricant can work into the hinge while its parts are in motion.

CAUTION: Storing open containers of caustic chemicals inside the cabinets can be corrosive to the hinges.

HIGH DENSITY POLYETHYLENE (HDPE)

LIMITED LIFETIME WARRANTY

Assures the cabinetry you are buying is good quality and without manufacturing defects, for years of worry-free enjoyment.

DURABLE CONSTRUCTION

The 3/4" marine-grade HDPE is UV and weather resistant. Cabinets will never rot, delaminate, or splinter and never need refinishing.

100% RECYCLABLE

HDPE has a recycling code of 2, which means at the end of its lifetime, it is easily recycled into usable products for home and garden.

MADE IN THE USA

Discover the excellence of American-made outdoor cabinetry. Endura is manufactured and hand assembled in Tampa, Florida with materials sourced by American companies.
